

CAD (Basic)

School: SoCal ROC
Course ID: 304
Availability: Call 310-224-4200

Short Description

Design and prepare plans for using computer-aided design and drafting.

Description

This course offers training in CAD (AutoCAD Release 2013). Students create mechanical, electrical, and architectural drawings by using orthographic projections. Covers basic computer-aided, two-dimensional drafting and CAD management concepts used to create professional building design industry drawings.
