

CompTIA Server+ Certification

School: SoCal ROC
Course ID: 518
Availability: Call 310-224-4200

Short Description

This class is designed for the individual seeking to become a System Administrator or Advanced Computer Technician.

Description

Prerequisite: students must pass the A+ Certification course or exam. Server+ focuses on server-specific hardware and operating systems, and verifies technical knowledge in areas such as RAID, storage, and multiple CPUs, as well as capabilities with server issues, including disaster recovery. The eight domains of the Server+ exam are General Server Hardware Knowledge, Installation, Configuration, Upgrading, Proactive Maintenance, Environment Troubleshooting and Problem Determination, and Disaster Recovery. The combination of A+ and Server+ certifications can fulfill the elective exam requirement for the Microsoft Certified Systems Administrator (MCSA) certification. Open to high school and adult students. Upon successful completion of the CompTIA Server+ Certification program, the student will have the opportunity to acquire a voucher through SoCal ROC that reduces the cost of the CompTIA Server+ Exam.

Prerequisites

Prerequisite: students must pass the A+ Certification course or exam. Students who enroll in CompTIA Server+ Certification must pass the Computer Technician course or have similar experience.

On the Job Training

No
