

Residential Electrical Wiring

School: SoCal ROC
Course ID: 514
Availability: Call 310-224-4200

Short Description

Learn how to do basic electrical wiring in new and existing homes.

Description

This electrical fundamentals program provides students with instruction in electrical installation and related skills, safety standards, tools and instrumentation, and terminology. Also includes electrical theory, industry mathematics, interpretation of blueprints and schematics, and the application of electrical laws. Students practice all skills in a lab setting on a stimulated residential structure.

Prerequisites

High school students must pass the Intro to Construction Careers: Electrical course or have similar experience.
