

Veterinary Science

School: SoCal ROC
Course ID: 322
Availability: Call 310-224-4200

Short Description

Are you thinking about obtaining a Doctor of Veterinary Medicine degree or becoming a Veterinary Technician? This may be the ideal place for you to start.

Description

This course will offer students the opportunity to acquire advanced animal principles, know and respect diversity in the animal kingdom, and become animal advocates for animal welfare on all levels encompassing family pets, domestic livestock and wild life resources. Students will be prepared for advanced post-secondary level education in animal science, biology, and/or zoology. This course will also incorporate research methods to perform in depth studies of the anatomy and physiology of a variety of animal species, science labs, and advanced communication and critical thinking skills. This course is open to high school and adult students.

Prerequisites

Prior to enrolling: Open to high school and adult students If an adult, provide proof of a HIGH SCHOOL DIPLOMA or GED (translated into English) A signed Student Waiver and Release Form is required.
